

27. Zebra crossings

Approaching

- Look for pedestrians on or near the crossing
- MSM - Early mirror check
- Slow enough to stop safely
- No parking or overtaking on the zig-zag lines
- Where there is a central island treat the crossing as two separate crossings
- Beware - pedestrians might not know the rules!

At the crossing

- Wait behind Give Way/Stop line
- Secure the car
- **It is dangerous to beckon pedestrians to cross the road**

Proceeding

- Proceed when the crossing is clear and it is 100% safe
- Check blind spots - someone may run onto the crossing
- Keep crossings clear in traffic queues
- School/Police controlled: proceed when signalled to do so if safe

Take special care when children are crossing
